FOREX TRADING pro

DEPOSIT BONUS TERMS

- The deposit bonus is credited at the client's request equal to 100% of the deposited amount
- The bonus is limited up to $5,000 per account
- At the end of every trading day, the bonus is converted into withdrawable funds at the end of every day. Rebate = 0.40USD for each standard lot closed*
- Any bonus in the "Credit" column of MetaTrader 4 **cannot** be withdrawn
- The bonus is automatically cancelled upon withdrawal
- The bonus cannot be used for news trading

Currency pairs and metals only

IMPORTANT:

The bonus is EXCLUDED from the balance during stopout calculation and is cancelled at stopout. Thus, you cannot drawdown into the bonus. Having a deposit bonus on your account will not enable you to hold onto trades longer than you otherwise would be able to without the bonus.

In the MetaTrader 4 trading platform the bonus is included in the equity. To calculate your real margin level you must calculate the following

$$\text{True Margin Level} = \frac{\text{Equity} - \text{Bonus}}{\text{Margin}}$$

where "Margin" is the margin currently in use to sustain all open trades.
